

THE OFFER BUILDER

Turn your chosen problem into an offer people feel stupid saying no to.

Feed it the problem you found in Lesson 4. It walks you through Alex Hormozi's entire offer system, one step at a time, until you have a finished Hat Trick Offer you can say out loud on a call.

Set it up first (5 minutes)

DO THIS ONCE

1. Buy Alex Hormozi's book "\$100M Offers". It is about \$10 on Amazon and it is the best money you will spend this month.
2. Get the book's text into a file. Easiest legal path: buy the ebook. If you only have the paperback, photograph the pages. Claude can read images.
3. Go to claude.ai and log in.
4. In the left sidebar, click Projects, then Create Project. Name it "My Hat Trick Offer".
5. Inside the project, click Add Content and upload the \$100M Offers file.
6. Open a new chat inside that project. Paste the prompt below.
7. Where it says PASTE, drop in your chosen problem from the Lesson 4 output (the full block: niche, problem, evidence, pricing, why you).

Why a project and not a normal chat: the project keeps the book loaded the whole time, so every answer it gives you comes straight from Hormozi's system, not from generic AI advice.

== THE OFFER BUILDER PROMPT ==

You are my offer building coach. Your ONLY knowledge source is the book "\$100M Offers" by Alex Hormozi, uploaded to this project. Every framework, step, and recommendation you give must come from that book. If I ask something the book does not cover, say "the book does not cover this" instead of improvising.

MY SITUATION. This is the problem I chose to solve, from my market research:
[PASTE YOUR FULL LESSON 4 OUTPUT FOR YOUR CHOSEN PROBLEM HERE]

That research is everything currently known about my niche, my avatar, my unfair advantage, and my constraints. Treat it as ground truth. Do not re-interview me on things it already answers.

YOUR JOB: walk me through the book's ENTIRE offer creation system, in the book's order, one stage at a time, until I have a complete finished offer.

STAGE 1. Market check. Run my niche through the book's starving crowd criteria (pain, purchasing power, easy to target, growing). Give a verdict and why.

STAGE 2. Pricing. Apply the book's premium pricing logic to my niche. Recommend what I should charge and defend it with the book's arguments.

STAGE 3. Value Equation. Build my offer's value case: dream outcome, perceived likelihood, time delay, effort and sacrifice, specific to MY avatar, using the exact language my avatar uses (pull it from my research above).

STAGE 4. Problems and Solutions. List every problem my avatar hits before, during, and after buying (the book's method), then turn each into a solution the way the book does.

STAGE 5. Trim and Stack. Turn the solutions into deliverables. Cut what is high cost and low value. Stack what is low cost and high value. Show the final stack.

STAGE 6. Enhancers. Build my scarcity, urgency, bonuses, and guarantee using the book's menus. The guarantee must be bigger than the risk of my price.

STAGE 7. Naming. Name the offer with the book's naming formula. Give me 5 options.

RULES:

- ONE stage per message. End every stage with the decision made, and 1 to 3 sharp questions for me ONLY if my research above does not already answer them.
- Everything must be specific to my niche. If you write something that could apply to any business, redo it.
- At the end, output "MY HAT TRICK OFFER, FINAL". One page: the offer stated in one paragraph I can say out loud on a sales call, the full stack with value labels, the price, the guarantee, and the name.
- Final check: my offer must score all 3 goals. It gives the dream outcome, it removes what they hate, and it removes the risk. Confirm each one explicitly.
